REPORT ON PAYMENTS TO GOVERNMENTS

Financial year ending December 31, 2018

1. INTRODUCTION

- **Context**

This report was drawn up in compliance with article L 225-102-3 of the French Code of Commerce, which transposes the European “accounting” directive 2013/34/EU of June 26, 2013 and its implementation decree, Decree 2015-1380 of October 29, 2015 on transparency in payments to public authorities by extractive and forestry sector companies.

- **Methodology**

In line with French regulatory requirements, all payments in excess of the legally defined materiality threshold of €100,000 made to “governments” by entities that are controlled by the Group as defined by the provisions of article L 233-3 of the French Code of Commerce and which have extractive activities are reported.

“Government” refers to any national, regional or local authority of a State or Territory, or any administration, agency or company controlled by such an authority.

To make the report clearer, payments corresponding to the categories referred to in article L 225- 102-3 of the French Code of Commerce are classified into four categories:

- **Taxes:** taxes received on companies' income, production or profits, excluding taxes received on consumption such as value-added tax, private individuals' income tax or sales tax;
- **Royalties;**
- **Fees:** license fees, rental fees, admission fees and other considerations for licenses and/or concessions;
- **Other payments:** signing, finding and production bonuses, payments for infrastructure improvements, production rights, dividends.

Data are reported in € millions. Payments made in local currency have been converted into euros using the average annual rate for 2017.

With regards to taxes, the reported amounts correspond to each entity's estimated tax expense, as calculated within the Group's consolidated financial statements. Tax payments are made in accordance with current local regulations, particularly in the form of installments.

Some entities, marked by an asterisk, come under a tax consolidation scope in the country in question which includes entities without any extractive activity. The amount of tax to be paid by the Group in this country may therefore differ from the amounts reported for entities with extractive activities.
