

## Imerys Environmental Charter

### **Preserving the environment is a priority commitment for Imerys.**

Conscious of the responsibility we bear, we have made the preservation of the environment an integral part of our business strategy and our actions aim to reduce the environmental footprint of our activities and our products. Our environmental objectives and action plans are integrated into SustainAgility, our Group Corporate Social Responsibility program.

Under this Corporate Environmental Charter we are committed to:

- **Comply with all applicable environmental requirements** on all our sites, wherever we operate in the world and reduce the risks and impacts of our operations as part of a continuous improvement program,
- **Optimize the efficient use of natural resources** to reduce the environmental footprint of our activities and products,
- **Integrate the preservation of biodiversity<sup>1</sup>** into all our operations and take concrete action to provide solutions for the conservation of biological diversity and its restoration,
- **Reduce greenhouse gas emissions** linked to processes and energy consumption by 36% relative to revenue (tCO<sub>2</sub>/M€) by 2030 from a 2018 base year in alignment with a 2°C trajectory,
- **Promote climate solutions** by assessing the carbon footprint of our products and innovating to reduce downstream emissions.

Compliance with these commitments is based on a dedicated organization, with defined roles and responsibilities, a solid environmental management system, time-bound action-plans, performance monitoring indicators, audit procedures and a continuous improvement program.

Every Imerys site shall pursue its environmental objectives and implement local action plans in line with this Group Environmental Charter.

**Our environmental objectives and results are regularly reviewed by senior management and disclosed to ensure transparent communication with our stakeholders.**
